1x Visual Cable

Australian System

Australian company.
Apps and software were designed in Australia.
Australian owned and operated.

Parking Mode

The system utilises a smart power system. This enables the dash camera to keep recording even when your engine is turned off, giving you peace of mind while your car is left unattended. Multiple parking modes are available.

Incident & Impact detection

When an impact is detected, the built-in G-Sensor in the front camera will save this footage, enabling you to locate it quickly and protect against overwriting. G-Sensor sensitivity can be adjusted, giving you personalised control.

WIFI & Smart Phone App

Connect your smartphone via the app to easily access photos, videos, and incident or parking footage. Download and share directly from your phone. Each dash camera includes a 64GB SD card and warranty.

Hybrid or EV Vehicles

Ask about a back-up battery.
- 35 to 50 hours of Parking Mode
- Fast Charging
- Uses the battery in Parking Mode (not your car)

Clearview
4K DASH CAMERA

Parking mode requires the dash camera to be hardwired with permanent power. The smart power system will shut the camera off if the battery voltage drops below the pre-set voltage to protect the vehicles battery. Warranty terms, conditions & exclusions apply.
